PROJECTS

Calculator

Technologies Used: HTML, CSS, JavaScript

• Built a functional calculator with basic arithmetic operations.

- Designed a responsive UI for both mobile and desktop screens.
- Used JavaScript to handle user inputs and perform real-time calculations.

Women's Fashion Store (E-commerce Website)

Technologies Used: HTML, CSS, Bootstrap

- Designed and developed a responsive e-commerce website for women's fashion.
- Implemented a structured layout with Bootstrap grid system for better UI/UX.
- Included sections like homepage, product catalog, about us, and contact page.
- Optimized the website for different screen sizes using Bootstrap components.

To-Do List

Technologies Used: HTML, CSS, JavaScript

- Implemented features like adding, deleting, and marking tasks as completed.
- Used local storage to retain tasks even after page refresh.

Sample Meesho Web Application (E-commerce Website)

This project is a simple and responsive e-commerce web application built using **HTML**, **Bootstrap**, **CSS**, and **JavaScript**.

It allows users to browse products, add items to the cart, and view total pricing dynamically.

Key Features:

1. Home Page & Product Listing

- A visually appealing homepage with a product grid layout.
- o Products are displayed with images, descriptions, and pricing.

2. Responsive Design

Uses Bootstrap Grid System to ensure adaptability across devices (desktop, tablet, mobile).

3. Shopping Cart Functionality

- o Users can add/remove products from the cart.
- Dynamic cart update using JavaScript.

4. Checkout Page

o Displays selected items, total amount, and a simple checkout form.

5. Interactive UI

o Includes **Bootstrap Modals**, **Navbar**, and **Buttons** for an enhanced user experience.
